
MEDICAL FACILITY EXPERIENCE

Project: **FAITH FAMILY MEDICAL CLINIC**
Nashville, Tennessee

Client: Jack Faris, FFMC Director
Nashville, Tennessee

This faith-based non-profit medical clinic renovated their building to serve the needs of their ever-growing client base.

Recently completed Phase I involved remodeling some interior spaces to make additional provider workspace and one new exam room, as well as reconfiguring the reception and business office for greater workload. Future Phase II will involve a 3,000 square foot addition that will add waiting room space, offices, exam rooms, and consultation areas.

Project: **MRI SUITE**
CENTENNIAL MEDICAL CENTER
Nashville, Tennessee

Client: Flow Construction Company
Nashville, Tennessee

An existing MRI room and associated control area was enlarged and reconfigured to accommodate a new, more powerful scanner. Existing walls, floor slabs, and ceilings were re-worked with new lead shielding as required for the greater magnetic fields.

Project: **MRI SUITE**
CLARKSVILLE IMAGING CENTER
Clarksville, Tennessee

Client: Flow Construction Company
Nashville, Tennessee

To accommodate a larger, more powerful scanner, this existing wood-frame building needed an 80 square foot room addition, as well as re-working of the existing walls, floor slab, and ceilings as required for new x-ray shielding plates. Careful coordination ensured minimal down-time for this busy clinic during the remodel and equipment change.

Project: **BIOGRAPH EMOTION DUO SUITE**
U.T.C.I. MEMPHIS
Memphis, Tennessee

Client: Flow Construction Company
Nashville, Tennessee

Approximately 1,540 square feet of shell space within the existing University of Tennessee Cancer Institute was built out to accommodate lab space, uptake rooms, waiting rooms, equipment and control rooms and the main CT scanner room, with all required lead shielding.

Project: **G.E. DISCOVERY SYSTEM SUITE**
V.A. HOSPITAL
Nashville, Tennessee

Client: Flow Construction
Nashville, Tennessee

An existing 1,240 square foot space within the Hospital was remodeled for the needs of the new equipment and CT scanner, along with associated dosing rooms and work areas. Wall, floor, and ceiling structures were upgraded according to x-ray shielding requirements.

Project: **BLOUNT COUNTY EYE CARE**
Maryville, Tennessee

Client: Dr's Lloyd and William Tantum
Maryville, Tennessee

A completely new, 10,000 square foot, two-story optometry office and clinic is in schematic design for this successful practice. The new building will feature exam suites for both doctors, as well as shared facilities for special procedures and surgeries, and an optical sales area and laboratory.

The exterior of the building will meet with the strict Maryville design standards, including rustic exterior materials of stone, brick, and wood, and craftsman architectural elements to compliment the local vernacular of the Smokey Mountains.

Project: **THE DELOZIER CLINIC
MEDICAL OFFICES
Nashville, Tennessee**

Client: Joseph B. Delozier III, M.D.
Nashville, Tennessee

This 4,000 square foot health care facility was a complete renovation of an early 20th century residence in mid-town Nashville. This medical facility is comprised of waiting areas, examination rooms, business offices and a complete operating-room complex for a cosmetic and reconstructive surgery.

Project: **NASHVILLE HUMANE ASSOCIATION
Nashville, Tennessee**

This 14,000 square foot facility includes an operating room, treatment rooms, isolation rooms, kennel and adoption areas, as well as administrative offices and public support and services areas.

Project: **SOUTHSIDE MEDICAL GROUP
Nashville, Tennessee**

This 12,000 square foot facility houses five Physician groups along with speculative medical office space and support facilities. The two-story configuration contains separate office suites that accommodates the various internal medicine, pediatrics and obstetrics/gynecology groups.

Project: **HEALTHSOUTH REHABILITATION CORP
Nashville, Tennessee**

The 10,000 square foot facility included administrative, examination, rehabilitation, physician office and support functions. The existing retail shell space was adapted to accommodate the prototypical components that have been developed by one of the region's largest rehabilitation corporations.

Project: **HENDERSONVILLE PROFESSIONAL BUILDING
Hendersonville, Tennessee**

This 14,000 square foot facility is comprised of a variety of medical office suites, including internal medicine, obstetrics/gynecology, cosmetic surgery, dentistry and pharmacy. The single-story structure is surrounded by patient and staff parking providing a highly visible and easily accessible entrance to each physician's suite.
