PERSONAL HISTORY

Ms. Fenton has been responsible for all aspects of construction document production, consultant and engineering coordination, and construction execution on large commercial, government, corrections, small commercial, and residential projects. She has served in many roles including project manager, project coordinator, team leader, specifications writer, and detailer. She has also trained existing and new technical staff in CAD, including training and mentoring of students and Interns from their graduation and hire through their Intern Development Program process. She is also a volunteer with ACE Mentor Program, teaching high school students about careers in Architecture, Construction, and Engineering.
